Safety Instructions

- To use the Phone, please follow the instructions in this user manual.
- Use the power adapter supplied with your phone. Other power adapters may damage the phone.
- This phone is only for indoor use. And also avoid in high humidity, water and some other liquids.
- Do not use the phone during thunderstorms.
- CE
- FCC

WEEE Warning

To avoid the potential effects on the environment and human health as a result of the presence of hazardous substances in electrical and electronic equipment, end users of electrical and electronic equipment should understand the meaning of the crossed-out wheeled bin symbol. Do not dispose of WEEE as unsorted municipal waste and have to collect such

WEEE separately.

Cleaning

To clean the device, use an anti-static cloth. Please avoid cleaning liquids as they might

damage the surface or internal electronics of the phone.

FCC Statement

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference.

(2) This device must accept any interference received, including interference that may cause undesired operation.

2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.

Summary of changes

This section describes the changes to this user manual for each release and user manual version.

Change for Release x.0.4.0.10, Manual version x.0.4.0.10

Major updates have occurred to the following sections:

Label Scroll

Change for Release x.0.4.0, Manual version x.0.4.0

Major updates have occurred to the following sections:

- <u>IPv6</u>
- <u>IPv4&IPv6</u>

Change for Release x.0.3.98.O, Manual version x.0.3.98.O

Major updates have occurred to the following sections:

Reboot in Talking

Change for Release x.0.3.98.A, Manual version x.0.3.98.A

Major updates have occurred to the following sections:

<u>Auto Logout Time</u>

Change for Release x.0.3.98, Manual version x.0.3.98

Major updates have occurred to the following sections:

Daylight Saving Time

Change for Release x.0.3.93, Manual version x.0.3.93

Major updates have occurred to the following sections:

- <u>Check-Syn With Authenticate</u>
- <u>Call Back</u>

Change for Release x.0.3.88, Manual version x.0.3.88

Major updates have occurred to the following sections:

- Visual Alert for BLF Pickup
- Detect IP Conflict

Change for Release x.0.3.72, Manual version x.0.3.72

Major updates have occurred to the following sections:

- Voice Mail Tone
- Backup NTP Server
- Intercom Barge

Change for Release x.0.3.65, Manual version x.0.3.65

Major updates have occurred to the following sections:

Redial Mode

Change for Release x.0.3.63, Manual version x.0.3.63

Major updates have occurred to the following sections:

- Suppress DTMF Display
- Suppress DTMF Display Delay

Change for Release x.0.3.62, Manual version x.0.3.62

Major updates have occurred to the following sections:

<u>Auto Redial</u>

Getting Started

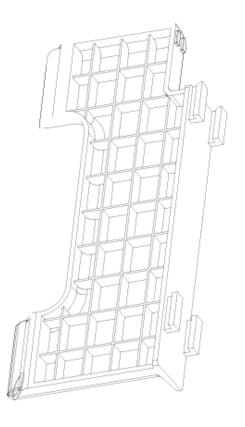

Packing List

The package contains the following parts, please check if all the items are not missed:

1. The phone station

2. The phone stand

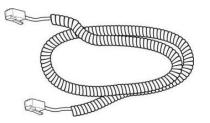

3. Handset

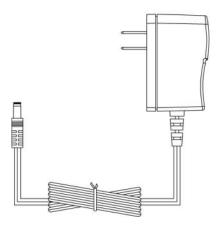

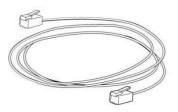

4. Headset cord

5. Power adapter

6. Ethernet cable

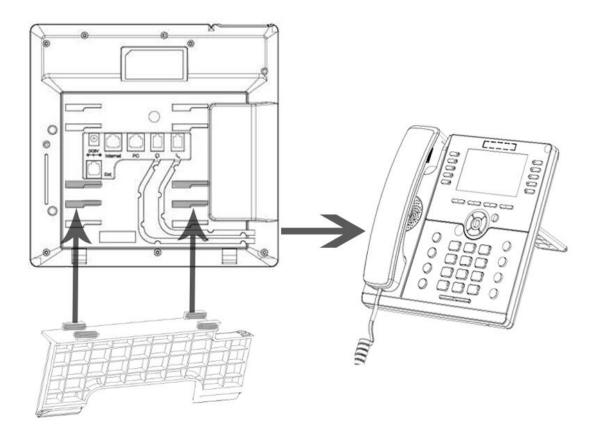

7. User Manual

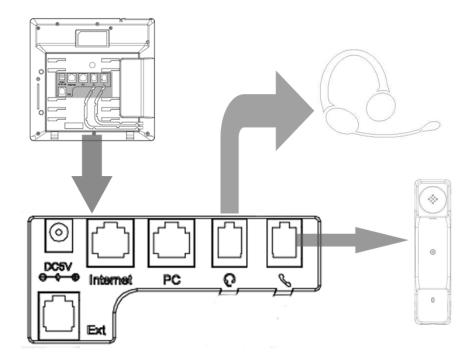

Phone Installation

1. Attach the phone stand

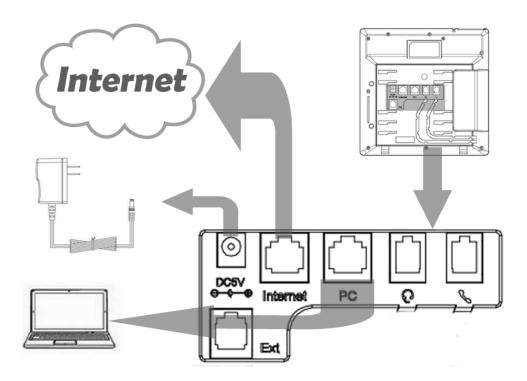

2. Connect the Handset and optional Headset

3. Connect the Network and Power

Initialization

After your phone has been powered up, the system boots up and performs the following steps:

Automatic Phone Initialization

The phone finishes the initialization process by loading the saved configuration. The phone LCD screen will display "Booting"

And then show "Initializing "during the initialization.

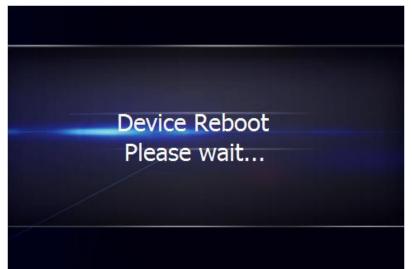

The IP Phone will upgrade the firmware if there is a new firmware on your server. And the IP Phone will show "Check firmware, please wait..." after initialization.

Then IP Phone will show Reboot information:

By default, the phone attempts to contact a DHCP server in your network in order to obtain its valid network settings, e.g. IP address, subnet mask, default gateway, DNS server.

Status

You can view the system status of your phone via phone user interface or web user interface. The information of phone status includes: Information (e.g., Model, IPV4, IPV6, MAC, Firmware, Hardware), Network (e.g., WAN Type, IP, Mask, LAN Type, Gateway, DNS ...) Account (e.g., register status of accounts)

To view the phone status via phone interface:

1. Press Menu → Status → Information/Network/ Accounts

Information		
1.Model:	UC926

Stay red	Other member of the SCA group's led status when a member of the SCA group in active status	

Other Key Led

Кеу	Description	
Headset Key	When using in headset mode, the led is steady green or the LED is off.	
Message Key	Blinked green when there is a new message or the LED is off.	
Mute Key	Red when the mute the call, or the LED is off.	

User Interface

There are two ways to customize specific configurations on your IP phone:

- The user interface on the IP phone
- D The user interface in a web browser on your PC

The hardware components keypad and LCD screen constitute the phone user interface, which allows the user to execute all call operation tasks and basic configuration changes directly on the phone. In addition, you can use the web user interface to access all configuration settings. In many instances, it is possible to use both the phone user interface and the web user interface to operate the phone and change settings. However, in some instances, it is only possible to use the phone or the web user interface.

Screen Saver

There are three types of screen saver: Time & Logo, Photo Switch and Static Photo.

Time & Logo: when the screensaver works, it will show Time and logo in turns.

Photo Switch: all screensaver pictures display one by one.

Static Photo: Only the selected picture will display as screensaver.

Text logo: It works with the **Time & Logo**, when enter the value, it will display the time and the entered value in turns.

To enable screen saver via Phone interface:

- 1. To press Menu \rightarrow Display \rightarrow Screensaver...
- 2. Press > and < or press Switch soft key to Choose the Time-out as 1 min or 2/5/10/30 minute.
- 3. Enter the Screensaver Type to choose one of the type: Backlight off, Time & Logo and Photo
- 4. Press or Save soft key to save the selected configuration.

Daylight Saving Time

Daylight Saving Time (DST) is the practice of temporary advancing clocks during the summertime so that evenings have more daylight and mornings have less. Typically, clocks are adjusted forward one hour at the start of spring and backward in autumn. Many countries have used the DST at various times, details vary by location. The DST can be adjusted automatically from the time zone configuration. Typically, there is no need to change this setting

LED Status Setting

The LED Status setting mainly defines the power indicator LED.

To configure LED Status via web interface:

- 1. Click Setting → Preference
- 2. Select Yes or No for Power Status, Ringing Status, Miss Calls Status and Voice Message Status.

3. Click SaveSet for

k saveset for the setting.

For the LED status description, see: LED Instruction Power Indicator LED

LED Status Setting:		
Power Status	Yes	© No
Ringing Status	Yes	© No
MissCalls Status	© Yes	No
Voice Message Status	© Yes	No

Key as Send

To configure Key as Send via phone interface:

- 1. Press Menu \rightarrow Features \rightarrow Key as Send
- 2. Press \bigcirc and \bigotimes key to select the enable choice.
- 3. Press Or Save soft key to save the configuration

	Key as Send	
1. # as Send Key:	<i>i</i> Enable	<>

To cancel # Key as Send via phone interface:

- 1. Press Menu \rightarrow Features \rightarrow Key as Send
- 2. Press > and < key to select the disable choice.
- 3. Press or Save soft key to save the configuration

Network Setting

Htek IP Phone supports IPv4、IPv6、IPv4&IPv6.They have three mode of Network: DHCP,

Static, and PPPoE. The default mode is DHCP, it will obtain IP address and other information automatically.

If your phone cannot contact a DHCP server for any reason, you need to configure a static IP address manually.

When switch DHCP, Static IP and PPPoE to each other, or change the Static IP on Web interface, it will show the warning of restart as following.

Network settings have been changed, Are you sure re	boot the phone to save changes?
	OK Cancel

IPv4

If you set IP Mode to IPv4,IP phone will use IPv4 address. IPv4 has three network modes: DHCP, Static, and PPPoE

To configure IPv4 via phone interface:

- Press Menu→Setting→Advanced Settings (password: admin) →Network→WANPort →IP Port Mode.
- 2. Press > or < to change the IP Port Mode..
- 3. Press Or Save soft key to save the configuration.

	WAN Port	
1.IP Port Mode:	i IPV4	< >
2.IPV4		
3.IPV6		\times
4.WAN HTTP Acc	ess i Enable	<>
Cancel		Save

To configure IPv4via Web interface:

- 1. Click Network→Basic→ Internet Port
- 2. Select IPv4 for Internet Port
- 3. Click SaveSet for the setting.

Internet Port		
IP Mode (IPv4/IPv6)	IPv4	۲

To configure DHCP via phone interface:

- 1. Press Menu→Setting→Advanced Settings (password: admin) →Network→WAN Port IPv4→DHCP mode.
- 2. Click Save and restart the phone.

To configure a static IP address via phone interface:

- Press Menu→Setting→Advanced Settings (password: admin) →Network→WANPort →IPv4 →Static mode.
- 2. Enter the parameters: IP, Netmask, Gateway, Pri. DNS(primary dns), sec. DNS(second DNS) in the corresponding fields.

	Static	mode	
1.IP:		192.168.1.12	5.
2.Netmask:		255.255.254.	0
3.Gateway:		192.168.0.1	$\overset{\times}{\overset{\times}{\overset{\times}{\overset{\times}{\overset{\times}{\overset{\times}{\overset{\times}{\overset{\times}$
4.Pri.DNS:		218.2.2.2	
5.Sec.DNS:		218.4.4.4	
Cancel	123	Delete	Save

3. Click Save and restart the phone.

	Static mode	
1.IF <mark>NOTE</mark> 2.N 3.G System wil	l restart, Are you sure ?	
4.P	218.2.2.2	
5.Sec.DNS:	218.4.4.4	
Cancel		ок

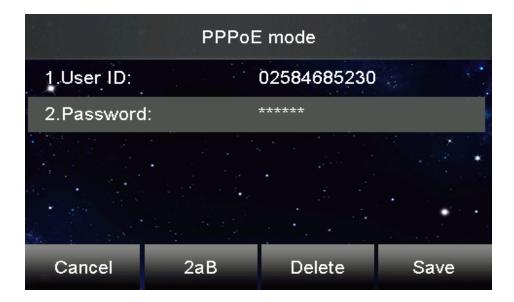

Press the Save soft key to accept the change or the Cancel soft key to cancel. If you are using an xDSL modem, you can connect your phone to the Internet via PPPoE mode. You can set a WAN port to be a PPPoE port. The PPPoE port will perform a PPP negotiation to obtain the IP address. Contact your system administrator for the PPPoE user name and password.

To configure PPPoE via phone interface:

- 1. Press Menu→Setting→Advanced Settings (password: admin) →Network→WANPort →PPPoE mode.
- 2. Enter the User ID and password

3. Click Save and restart the phone.

To configure Network via web interface:

- 1. Click Network→Basic→IPv4 setting
- 2. Select the desired Type: DHCP, Static or PPPoE
- 3. Filled the necessary information.
- 4. Click the SaveSet and restart the phone.

Contact Setting

This section provides the operating instructions for managing contacts. The topics include:

- Local Directory
- Remote Phonebook
- LDAP
- Search Contact

Local Directory

In the directory, you can add or delete your friends, business partner or anyone others' phone No. so you will not forget their number. Or put some anonymous phone No. in the blacklist to prevent from being disturbed. The local Directory can add up to 1000 contacts.

A. To add contacts list into local directory

To add contacts manually via phone interface

- 1. Press Menu \rightarrow Directory \rightarrow Local Directory
- 2. Press Add soft key.
- 3. Enter the necessary information as Name, Phone number...
- 4. Press save soft key or to add the contacts successfully.

	Add	Contacts			
1.Name:		Emma			Ĩ
2.Number:		302	:		
3.Mobile Ni	umber:			×	*
4.Other Nu	mber:	λ.* - ε			
• 5.Account:	at a george a se	Auto		< >:	•
Cancel	ABC	Delete		Save	

To add contacts from history via phone interface:

- 1. Press History soft key or press Menu \rightarrow History \rightarrow Local history
- 2. Press and and to select the targeted one. (Press and switched among the All calls, Dialed calls, Received calls, Missed Calls and Forward Calls).
- 3. Press Option soft key \rightarrow Add to Contacts

- 4. Edit the necessary information as Name, Phone number...
- 5. Press save soft key or to add the contacts successfully.

To add contacts via web interface:

- 1. Click Directory \rightarrow Directory
- 2. Enter the name, number and some other information.
- 3. Press Add and then press Save button.

3. Click Upload Photo to upload the photo.

When you place a call from the contact, the phone idle screen will show the contact photo.

Note:

The format of the photo supported is jpg or bmp Photo size should be less than 2MB, name length should be less than 48 characters.

To import or export the contact list

You can manage your phone's local directory via phone or web user interface. But you can only import or export the contact list via web interface.

To import an XML file of contact list via web interface:

- 1. Click on Directory
- 2. Click Browse to select a contact list file (file format must be .xml) from your local system.
- 3. Click Import XML to import the contact list.

To export an XML file of contact list via web interface:

- 1. Click on Directory
- 2. Click Export XML to export the contact list.

To import a CSV file of contact list via web interface:

1. Click on Directory

- 2. Click Browse to select a contact list file (file format must be .csv) from your local system.
- 3. Click Import Csv to import the contact list.

To export a CSV file of contact list via web interface:

- 1. Click on Directory
- 2. Click Export Csv to export the contact list.

Ph	oto	Auto	Import Local Contacts

Note:

If the xml file and CSV file more than 1000 contacts, the phone will only upload 1000 contacts.

Remote Phonebook

To set Remote Phonebook via web interface:

- 1. Login the Web interface and click Directory→Remote Phone Book
- Fill the path of the remote file in the Phone Book URL field. For example, <u>http://192.168.0.240/Phonebook/Phonebook.xml</u>
- 3. Fill the Name and then click SaveSet to save the configuration.

l-lte	k		Basic	Setting Configuration
Htek	Home	Account Network Functi	on Keys Setting	Directory Management
Directory Remote Phone Book Call History LDAP Network Directory MultiCast Paging	Index 1 /19 2 3 3 4 5 5	PhoneBook URL 2.168.0.240/Phonebook/Phonebook.xml	Name test	NOTE Demote Phone Book: Use this feature to download the phone's contact list from the server. You must enter the URL of the phonebook file (e.g: http://servername.phonebook.xml – must jaiso use https://), and rename the phonebook in the Name field

To check the contacts via phone interface:

Press Directory \rightarrow Left Button \rightarrow Left Button, and then you can see the item you set, press enter you will find the detail.

For More detail, please refer to: <u>Remote Phonebook</u> on <u>www.htek.com</u> .

Note:

Every remote contact, only supports 1000 contacts.

LDAP Phonebook

When use the LDAP feature, you can get the LDAP Phonebook directly.

To configure LDAP via web interface:

- 1. Login Web interface and click Directory→LDAP
- 2. Filled the LDAP Name Filter:
 - a) This parameter specifies the name attributes for LDAP searching. The "%" symbol in the filter stands for the entering string used as the prefix of the filter condition.
 - b) For example, (cn=%), when the name prefix of the cn of the contact record matches the search criteria, the record will be displayed on the IP PHONE LCD.
- Filled LDAP Number Filter: This parameter specifies the number attributes for LDAP searching.
- 4. Filled Server Address: Fill the domain name or IP address of the LDAP Server. For example: 192.168.0.9
- 5. Port (the port of the LDAP Serve) Base, User Name, Password

- 6. Max.Hits(1-32000): the maximum number of the search results to be returned by the LDAP server.
- 7. LDAP Display Name: the display name of the contact record displayed on the LCD screen.
- 8. Filled the relative value and then click save button the save the settings.

Following is the example screenshot for the configuration.

			logout

To Configure LDAP Key via phone interface:

- 1. Press Menu→Feature→Function Keys→Line Keys as Function Keys→Line Key 1
- 2. Select LDAP in the Type field
- 3. Press save or OK key to save the configuration.

When press the LDAP Key the LCD will display as following:

For More detail, please refer to LDAP Notes on www.h-tek.com

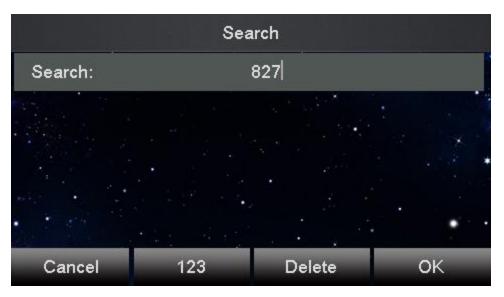

Search Contact

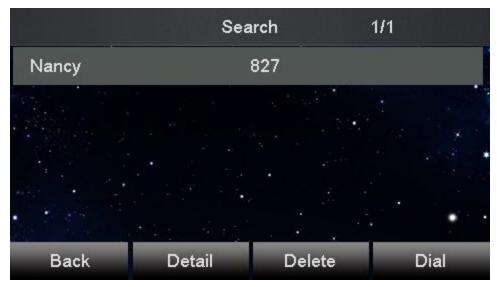

You can search contact in all contacts, local contacts, remote contacts and LDAP contact. **To search contact in all contacts:**

- 1. Click the Directory softkey on Idle interface.
- 2. Click the More Softkey, then you can see the Search softkey
- 3. Click the Search softkey, you can enter the desired part of name or part of number.

4. Click Ok softkey, then with the search content to match the contact will be displayed on the LCD.

Note:

If you don't click the OK softkey, then IP Phone will display the relevant contacts automatically within 5 seconds

To search contact in Local contacts:

- 1. Click the Directory softkey on Idle interface.
- 2. Click the > button and select the Local contacts list.
- 3. Click the More Softkey, then you can see the Search softkey
- 4. Click the Search softkey, you can enter the desired part of name or part of number.

5. Click Ok softkey, then with the search content to match the contact will be displayed on the LCD.

Note:

If you don't click the OK softkey, then IP Phone will display the relevant contacts automatically within 5 seconds

To search contact in Remote contacts:

- 1. Click the Directory softkey on Idle interface.
- 2. Click the (>) button and select the remote contacts list.
- 3. Select the desired the remote contact and click Enter softkey.
- 4. Click the Search softkey, you can enter the desired part of name or part of number.
- 5. Click Ok softkey, then with the search content to match the contact will be displayed on the LCD.

Note:

If you don't click the OK softkey, then IP Phone will display the relevant contacts automatically within 5 seconds

To search contact in LDAP contacts:

- 1. Click the LDAP function key.
- 2. Enter the first character or more of contact's name.
- 3. Select the desired the remote contact and click Enter softkey.
- 4. Then IP Phone will display the relevant contacts automatically within Search Delay.

Call History Setting

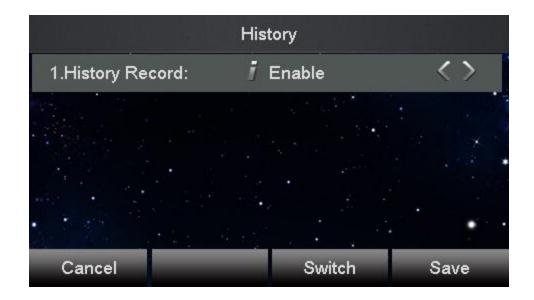

Call History

This phone maintains call history lists of Dialed Calls, Received Calls, Missed Calls and Forwarded Calls. The call history list supports up to100 entries in all on phone interface and more than 1500 items. You can check the call history, dial a call, add a contact or delete an entry from the call history list. You should enable the history record feature in advance.

To enable the history record feature via phone interface:

- 1. Press Menu→Feature→History Setting
- 2. Press > and < or Switch soft key to enable History record.
- 3. Press Save soft key to save the configuration.

To check the call history via phone interface:

- 1. Press the History soft key. The LCD screen displays All Calls list.
- 2. Press Right or Left Key to switch among All Calls, Missed Calls, Received Calls, Dialed Calls and Forwarded Calls.
- 3. Press to select the desired entry.
- 4. Press the Option soft key, and then select Detail from the prompt list.
- 5. The detailed information of the entry appears on the LCD screen.

Basic Setting Configuration

<	All Calls	1/8 >

Dial Plan

Dial plan is a string of characters that governs the way this phone processes the inputs received from your phone keypad. This phone supports dial plan with following accept digits:

1,2,3,4,5,6,7,8,9,0, *, #

Grammar Desc

Basic Setting Configuration

Х	any digit from 0-9;
XX+	at least 2-digit number;
٨	exclude;
,	hear dial tone;
[3-5]	any digit of 3, 4, or 5;
[147]	any digit 1, 4, or 7;
<2=011>	replace digit 2 with 011 when dialing.

To configure dial plan via web interface:

- 1. Click Account \rightarrow Advanced \rightarrow Dial Plan.
- 2. Filled the value in dial plan field.
- 3. Click SaveSet to save the configuration.

Emergency Call

I-Hek

Public telephone networks in countries around the world have a single emergency telephone number (emergency services number), that allows a caller to contact local emergency services for assistance when required. The emergency telephone number may differ from country to country. It is typically a three-digit number that can be easily remembered and dialed quickly. Some countries have a different emergency number for each of the different emergency services.

You can specify the emergency telephone numbers on the IP phone for contacting the emergency services in an emergency situation.

To configure emergency call via web interface:

- 1. Click Setting→Features→Phone Lock
- 2. Enter the emergency services number (e.g.110,119,120) in the Emergency field,
- 3. Click SaveSet to save the configuration.

Placing a call by hands-free speakerphone

- 1. Press the (), or press the Line key, then you can hear the dial tone.
- 2. Press the number.

To place a call by call history or Directory via phone interface.

1. Press the History soft key (On the idle page) or Menu \rightarrow History /Directory

2. Press and to select the targeted one.

3. Press the Send soft key, or , or , or the corresponding line key, then the call is sending.

Note:

- 1. The key is set to be a send key. For more information, refer to the Key as Send on page
- 2. During the call, you can also change among Headset, Handset or Free-speaker mode.

Making two calls with one line and one account

- 1. Press a line key and dial one phone number, then make a call.
- 2. Press the corresponding line key
- 3. Dial another phone number,
- 4. Press the Send soft key, or , then make the second call.

End a Call

Here shows to end a call during three modes:

To end a call by Handset

Press the Cancel soft key or hang up the handset, or press (x)

To end a call under Headset Mode

Press the Cancel soft key or press $\textcircled{0}$, or press \circledast).
-------------------------------------------------------------------------------	----

To end a call under hands-free speakerphone Mode

Press the Cancel soft key or press , or press .

Note:

1. During the conference, to end the call is same as mentioned above.

Redial a Call

- 1. To redial the last placed call from the IP Phone
- 2. Press O directly when LCD is on the idle interface.

Receive a Call

There are three ways to receive a call when the phone is ringing:

To receive a call by handset

Pick up the handset the conversation is built.

To receive a call by headset

Press and now the conversation is built.

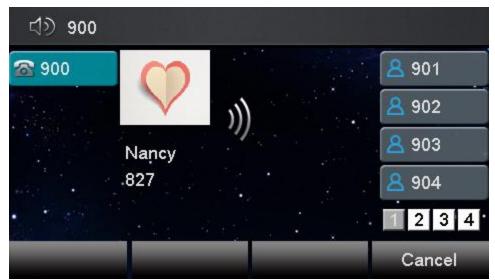

To receive a call by hands-free speaker

- 1. Option 1: Press directly.
- 2. Option 2: Press Answer soft key.
- 3. Option 3: Press the Line key (flashes red).

Moreover, some other action can be done by soft key when the call is coming.

- 1. To press the Reject soft key to reject the call. Or press \bigotimes to reject the current call.
- 2. To press Forward to forward to another phone.
- 3. To press Silence soft key, and then the call will keep silent, no ring tone display.

Incoming Call Show Mode

There are two incoming call show modes for this phone:

- 1. name and number of the contacts
- 2. name and number of the incoming call and the account which is connecting

To set incoming call show mode via web interface:

- 1. Click setting \rightarrow preference
- 2. Select the desire mode for the incoming call show mode
- 3. Click SaveSet to save the setting.

LED Status Setting:		
Power Status	● Yes ◯ No	
Ringing Status	● Yes ◯ No	
MissCalls Status	◯ Yes

To Disable Auto Answer via Web interface

- 1. To Click Account \rightarrow Advanced
- 2. To choose No for the Auto Answer.
- 3. To click Saveset to save the configuration.

Call Hold

When using the hold feature, the Hold icon will show on the display.

To make a call on hold during three modes:

To hold a call under handset mode:

- 1. Press Hold soft key or to hold the current call.
- 2. Press Resume soft key or

to resume the call on hold.

To hold a call under headset mode:

- 1. Press Hold soft key or to hold the current call.

2. Press Resume soft key or to resume the call on hold.

To hold a call during the speaker mode:

- 1. Press Hold soft key or to hold the current call.
- 2. Press Resume soft key or to resume the call on hold.

Call Transfer

This phone supports blind, attended and Semi-Attended Transfer.

Blind Transfer

When you use this feature, you can transfer

- 1. Press or Transfer soft key during the conversation, the call is on hold now.
- 2. Enter the number that transfers to.
- 3. Press (), and now the blind transfer completed.

Attended Transfer

When you use this feature, you can

1. Press or transfer soft key during the conversation, the call is on hold now.

්ා Trans	fer to		
8 900	90		8 901

NOTE: if the person that wanted to be spoken to do not want to answer the call, then the person that answered the coming call could use this function.

Call Conference

This IP Phone supports up to 5-way conference.

5-way conference

I-Itek

- 1. Assuming that call party A and B are in conversation. A wants to bring C, D and E in a conference
- 2. A press line 2 key, the call is placed on hold.

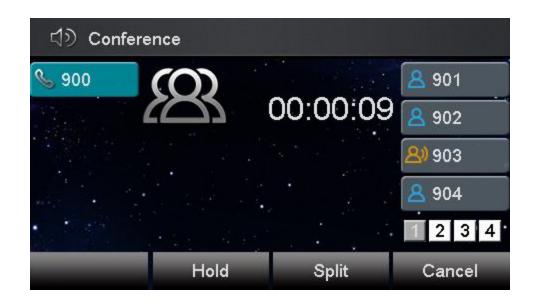

- 3. A enter the number of **C** and then press send soft key or
- 4. **C** answering the call.

or the conference soft key, then **A**, **B** and **C** are now in a conference.

(and now this is **3-way conference**)

- 6. A press line 3 key, the current 3-way conference is placed on hold.
- 7. A enter the number of **D** and then press send soft key or P.
- 8. **D** answering the call.
- 9. A press or the conference soft key, then A, B, C and D are now in a conference. (and now this is 4-way conference)
- 10. A press line 4 key, the call is placed on hold.
- 11. A enter the number of E and then press send soft key or .
- 12. E answering the call.
- 13. A press or the conference soft key, then A, B, C, D and E are now the 5-way conference is built.
- 14. A end the call, the conference is finished.

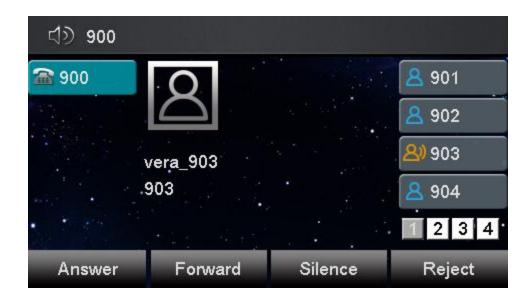

Note:

- 1. If C does not answer the call, A can back to continue the conversation with B;
- 2. Once A hangs up the call, the conference is ended, while if B or C drops the call, A&C or A&B conversation continues.
- 3. The conference feature is not available on all servers. For more information, contact your system administrator.
- 4. To realize the 5-way conference, the line should be all available.

Call Forward

This phone supports static forward (always forward, busy forward and no answer forward) and dynamic forward

To configure static forward

To configure always forward

With this feature, all incoming calls will forward immediately to configured number.

- 1. Press Menu \rightarrow Features \rightarrow Call forward \rightarrow Always Forward.
- 2. Press \bigcirc and \bigcirc to select the enable choice
- 3. Enter the forward to number and on code (optional), off code (optional).

4. Press or Save soft key to save the configuration.

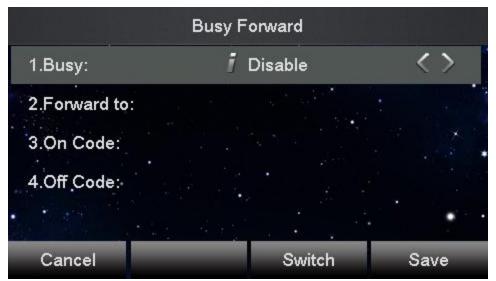

To configure busy forward

With this feature, the incoming calls are immediately forwarded if the phone is busy.

- 1. Press Menu \rightarrow Features \rightarrow Call forward \rightarrow Busy forward.
- 2. Press > and < to select the enable choice.
- 3. Enter the forward to number and on code (optional), off code (optional).
- 4. Press Or Save soft key to save the configuration.

To configure no answer forward

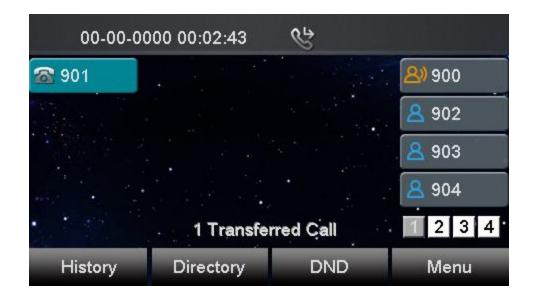

No Answer Forward: Incoming calls are forwarded if not answered after some time.

- 1. Press Menu \rightarrow Features \rightarrow Call forward \rightarrow No answer forward.
- 2. Press > and < to select the enable choice
- 3. Enter the forward to number and on code (optional), off code (optional).
- 4. Press () or Save soft key to save the configuration.

Function Key Features and Settings

The function key supports the **Line Label Length** and **Line Page Indicator**: **Line Label Length:** if this option is set Long label, then the label's length will be longer, it is used if the string is too long.

Line Page Indicator: Enable this option When the phone has been configured for four pages and current page is first page, the forth page has a BLF and BLF's status is changed, then the forth page's button will flash the red indicator.

Line

It works same as Line keys.

Line support three Mode (Default, lock and float)

Default mode: If there is an incoming call, the phone won't navigate to the set line key account page if the line key page is set as line type and current page is page four.

Lock mode: If there is an incoming call the line key set account will reflect on the same position on every page when the first page set as the line type.

Float mode: If there is an incoming call, the phone will navigate to the set line key account page if the line key page is set as line type and current page is page four.

To configure Line Feature via Web Interface

- 1. Click Function keys \rightarrow Line or Line Key.
- 2. Select the wanted Key and set as Line.
- 3. Select the Account.
- 4. Click the SaveSet button to save the configuration.

To configure the Voice mail feature via phone interface:

- 1. Press Menu→Messages→Voice Mail→Set Voice Mail.
- 2. Enter the AccountNO.1/2/3/4/5/6
- 3. Press or Save soft key to save the configuration

To configure Voice Mail Line Keyvia Web Interface:

- 1. Click Function keys \rightarrow Line Key.
- 2. Select the wanted Key.
- 3. Enter the desired voicemail feature codes in the Value field.

- 4. Fill the Label name to be displayed on LCD.
- 5. Select the Account.
- 6. Click SaveSet to save the configuration.

To configure a Voice mail key by phone interface:

- Press Menu → Features → Function Keys → Line or Line Keys as Function Keys → Line Key1(for example).
- 2. Select the targeted Line or Line Key.
- 3. Press (>) and (<) key to select the Voice mail in the type field.
- 4. Enter the Value Number.
- 5. Press > and < key to select the Account ID.
- 6. Press Or Save soft key to save the configuration

To leave a voice mail:

You can leave a voice mail when the receiver is busy or its inconvenient for them to answer the call. Follow the voice prompt from the system server to leave a voice mail, and then hang up.

To listen to voice mails:

When the phone interface prompts receiving new voice mail's icon, the power indicator LED flashes red(Setting->Preference: Enable Voice Message Status) and the voice message button flashes green.

- 1. Pressing Or the targeted Line or Line Key to dial out the voice mail access code.
- 2. Follow the voice prompt to listen to voice mail.

To view the voicemail via phone interface:

Press Menu->Messages->Voice Mail->View Voice Mail.

The LCD screen displays the amount of new and old voice mails

View Voice Mail					
1.901:	🖡 1 new, 18 old, 0 new urge				
2.Account2:	Not Registered				
3.Account3:	Not Registered				
4.Account4:	Not Registered				
• 5.Account5:	Not Registered				
Back					

Note :

This feature is not available on all servers. For more information, contact your system administrator.

Before listening to voice mails, make sure the voice mail access code has been configured.

When all new voice mails are retrieved, the power indicator LED, voice mail indicator LED and targeted Line or Line Key will go out.

Direct Pickup

With this feature, you can pick up the set line when it ringing.

To configure Direct Pickup feature via phone interface

- Press Menu → Features → Function Keys → Line or Line Keys as Function Keys → Line Key1(for example)
- 2. Press > and < key to select the Speed Dial in the type field.
- 3. Enter the value.
- 4. Press or Save soft key to save the configuration

Then the selected Line or Line Key will work as Direct Pickup.

To configure Direct Pickup feature via Web Interface

XML Browser

You can use this key feature to access the Xml browser quickly. The Xml browser allows you to create custom services which meet your functional requirements on the server. You can customize practical applications, such as weather report, stock information, Google search, etc.

To configure the XML Browser via Phone Interface

- Press Menu →Features →Function Keys→Line Keys as Function Keys → Line Key1(for example)
- 2. Select the wanted Line Key.
- 3. Press > and < key to select the XML Browser in the type field.
- 4. Filled the access URL for xml browser

5. Press or Save soft key to save the configuration

To configure the XML Browser via Web interface

- 1. Click Function key \rightarrow Line Key.
- 2. Select the desired Key and select xml browser in the Type.
- 3. Filled the access URL for xml browser (e.g.: http://192.168.0.240:8080/xmlbrowser/text.xml)
- 4. Click SaveSet button to save the configuration.

Broadsoft Group

When using the BroadSoft Group feature, by just pressing the key you can enter the Broadsoft Contacts interface quickly.

To configure the Broadsoft group via Phone Interface

- Press Menu →Features →Function Keys→Line Keys as Function Keys → Line Key1(for example)
- 2. Select the wanted Line Key.

- 3. Press > and < key to select the Broadsoft group in the type field.
- 4. Press Or Save soft key to save the configuration

To configure the Broadsoft group via Web interface

- 1. Click Function key \rightarrow Line Key.
- 2. Select the desired Key and select Broadsoft group in the Type.
- 3. Click the SaveSet button to save the configuration.

Conference

The Htek IP Phone supports up to 5-way conference. You are allowed to configure the programmable key to be used as a conference key. This key works same as \bigodot .

To configure the Conference via Phone Interface

- Press Menu →Features →Function Keys→Line Keys as Function Keys → Line Key1(for example)
- 2. Select the wanted Line Key.
- 3. Press > and < key to select the Conference in the type field.
- 4. Press Or Save soft key to save the configuration

To configure Conference via Web Interface

- 1. Click Function keys \rightarrow Line Key.
- 2. Select the desired Key and select Conference in the Type.

3. Click the SaveSet button to save the configuration.

Forward

If the key is configured as Forward key, press this key under the idle status, the IP phone will turn to the Always Forward interface and you can set the Forward to number, then when there is any call to that number it will be forwarded to the set number automatically.

To configure the Forward via Phone Interface

- Press Menu →Features →Function Keys→Line Keys as Function Keys → Line Key1(for example)
- 2. Select the wanted Line Key.
- 3. Press > and < key to select the Forward in the type field.
- 4. Enter the Number that to forward.
- 5. Press () or Save soft key to save the configuration

To configure Forward via Web Interface

- 1. Click Function keys \rightarrow Line Key.
- 2. Select the desired Key and select Forward in the Type.
- 3. Enter the Value with the number you want to forward.
- 4. Click the SaveSet button to save the configuration.

Transfer

You are able to configure the key as a transfer key to perform the Blind/Attended/Semi-Attended Transfer.

To configure the Transfer via Phone Interface

- Press Menu → Features → Function Keys → Line Keys as Function Keys → Line Key1(for example)
- 2. Select the wanted Line Key.
- 3. Press > and < key to select the Transfer in the type field.
- 4. Enter the Number that transfer to
- 5. Press or Save soft key to save the configuration

To configure Transfer via Web Interface

- 1. Click Function keys \rightarrow Line Key.
- 2. Select the desired Key and select Transfer in the Type.
- 3. Enter the Value with the number that wanted transfer to
- 4. Click the SaveSet button to save the configuration.

Hold

The key can be configured as a hold key. You can use this key to hold and resume a call during the conversation.

To configure the Hold via Phone Interface

- Press Menu → Features → Function Keys → Line Keys as Function Keys → Line Key1(for example)
- 2. Select the wanted Line Key.

- 3. Press > and < key to select the Hold in the type field.
- 4. Press Or Save soft key to save the configuration

To configure Hold via Web Interface

- 1. Click Function keys \rightarrow Line Key.
- 2. Select the desired Key and select Hold in the Type.
- 3. Click the SaveSet button to save the configuration.

Group Listening

With this feature, when you have an active call, you can listen using Handset and Free-speaker, but only can use the handset to speak.

To configure the Group listening via Phone Interface

- Press Menu → Features → Function Keys → Line Keys as Function Keys → Line Key1(for example)
- 2. Select the wanted Line Key.
- 3. Press > and < key to select the group listening in the type field.
- 4. Press Or Save soft key to save the configuration

To configure Group listening via Web Interface

- 1. Click Function keys \rightarrow Line Key.
- 2. Select the desired Key and select Group listening in the Type.

3. Click SaveSet to save the configuration.

DND

If the key is configured as DND key, allows you to activate the DND function immediately when you press it and the phone will reject all incoming calls automatically. Press it again to deactivate DND mode.

To configure the DND via Phone Interface

- Press Menu →Features →Function Keys→Line Keys as Function Keys → Line Key1(for example)
- 2. Select the wanted Line Key.
- 3. Press > and < key to select the DND in the type field.
- 4. Press Or Save soft key to save the configuration

To configure DND via Web Interface

- 1. Click Function keys \rightarrow Line Key.
- 2. Select the desired Key and select DND in the Type.
- 3. Click the SaveSet button to save the configuration.

To enable DND feature

Press the DND soft key when the phone is idle status, and then DND icon shown on the LCD.

To disable DND feature

Press the DND soft key again, and then there is no DND icon on the LCD.

Redial

If the key is configured as Redial key, you can redial the last placed call from the IP Phone.

To configure Redial via Web Interface

- 1. Click Function keys \rightarrow Line key/Line Key
- 2. Select the desired Key and select redial in the Type.
- 3. Enter the Label displayed on LCD.
- 4. Click the SaveSet button to save the configuration.

SMS

Send SMS

To send SMS via web Interface

- 1. Click Setting→SMS
- 2. Select the account (from which account the SMS sent)
- 3. Enter the target number
- 4. Input the content of SMS, and click Send.

Htek	Home Account	Network Function Keys s	etting Direc	logout story Management
Preference Features BLF Settings Date&Time Tones SMS Action URL	Account Number Message	Account 1	4	NOTE SMS Number: Input the phone number you will send message to and input the message's contents.
Softkey Layout TR069 SIP	Send	Cancel		

To send SMS via phone interface:

- 1. Click Menu→Message→Text Message→Set SMS
- 2. Enter the contents in the white field.
- 3. Press the save button
- 4. Select the account (from which account the SMS sent)
- 5. Enter the target number (to which account the number sent)
- 6. Press the Send button.

Set SMS Line Key

To configure the SMS via Phone Interface

- Press Menu →Features →Function Keys→Line Keys as Function Keys → Line Key1(for example)
- 2. Select the wanted Line Key.
- 3. Press \bigcirc and \bigotimes key to select the SMS in the type field.
- 4. Press Or Save soft key to save the configuration

To configure SMS via Web Interface

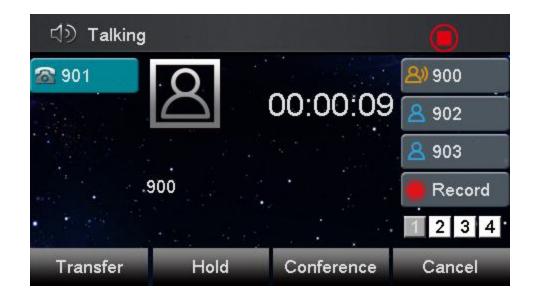

- 1. Click Function keys \rightarrow Line Key.
- 2. Select the desired Key and select SMS in the Type.
- 3. Click SaveSet to save the configuration.

Record

With record feature, you can record your calls by pressing the record key .

To configure the record via phone interface

- Press Menu →Features →Function Keys→Line or Line Keys as Function Keys → Line Key1(for example)
- 2. Select the wanted Line or Line Key.
- 3. Press > and < key to select the Record.
- 4. Press or Save soft key to save the configuration

To configure the record via Web Interface

- 1. Click Function keys \rightarrow Line or Line Key.
- 2. Select the desired Line or Line Key and select Record in the Type.
- 3. Click the SaveSet button to save the configuration.

Note:

Please contact the system administrator whether support this feature or not.

URL Record

The phone sends HTTP URL request to trigger a recording. Contact your system administrator for the predefined URL.

To configure the URL record via phone interface

- Press Menu →Features →Function Keys→ Line Keys as Function Keys → Line Key1(for example)
- 2. Select the wanted Line or Line Key.
- 3. Press > and < key to select the URL Record.
- 4. Press or Save soft key to save the configuration

To configure the record via Web Interface

- 1. Click Function keys \rightarrow Line Key.
- 2. Select the desired Line or Line Key and select URL Record in the Type.
- 3. Click the SaveSet button to save the configuration.

Paging

With this feature, you can call a paging group directly.

To configure the paging via phone interface

- Press Menu →Features →Function Keys→Line or Line Keys as Function Keys → Line Key1(for example)
- 2. Select the wanted Line or Line Key.
- 3. Press > and < key to select the Paging.
- 4. Enter the paging code followed the number.
- 5. Press or Save soft key to save the configuration

To configure the Paging via Web interface

- 1. Click Function keys \rightarrow Line Key.
- 2. Select the desired Line Key and select Paging in the Type.
- 3. Enter the paging code followed the number.
- 4. Click the SaveSet button to save the configuration.

El-Itek

Share Line

Htek IP Phone supports "Share Call Appearance" by Broadsoft and XCast standard. This feature allows members of the SCA group to share SIP lines and provides status monitoring (idle, active, progressing, hold) of the share line. When there is an incoming call designated for the SCA group, all of the members of the group will be notified of an incoming call and will be able to answer the call from the phone with the SCA extension registered in the group.

All the users that belong to the same SCA group will be notified by visual indicator when a user seizes the line and places an outgoing call, and all the users of this group will not be able to seize the line until the line goes back to an idle state or when the call is placed on hold (with the exception of when multiple call appearances are enabled on the server side).

In the middle of the conversation, there are two types of hold: Public Hold and Private Hold. When a member of the group places the call on public hold, the other users of the SCA group will be notified of this by the red-flashing button and they will be able to resume the call from their phone by pressing the line button. However, if this call is placed on private-hold, no other member of the SCA group will be able to resume that call.

To enable share call appearance, the user would need to register the share line account on the phone. In addition, they would need to navigate to "Account" -> "Advanced" on the webpage and set the line to "Share Line" and "SIP Server Type", and configure the line key or Line Key as "line" type with the desired account on webpage or LCD. If the user requires more share call appearances, the user can configure multiple line keys (Function keys->Line key) to be "line" type associated with the account.

This feature is very useful in the boss and secretary scenario. For example, the secretary can share the boss' extension number on her phone. When there is an incoming call to the extension number of the boss, both the phones of the boss and the secretary will ring simultaneously. Either the boss or the secretary can answer the call. Calls on share line can be placed on hold or barged in.

To configure the line key as line via phone interface

- Press Menu → Features → Function Keys→Line or Line Keys as Function Keys → Line Key1(for example)
- 2. Select the wanted Line or Line Key.

- 3. Press > and < key to select the Line in the type field.
- 4. Press > and < key to select the Account ID.
- 5. Enter the Label
- 6. Enter the Value
- 7. Press or Save soft key to save the configuration

To configure the line key as line via Web Interface

- 1. Click Function keys \rightarrow Line or Line Key.
- 2. Select the desired Line or Line Key and select Line in the Type.
- 3. Enter the Value.
- 4. Enter the Label.
- 5. Select the Account ID
- 6. Click the SaveSet button to save the configuration and then restart.

Note :

This feature is not available on all servers. For more information, contact your system administrator.

Public Hold

The key can be configured as a public hold key. During a conversation, all members belonging to that particular SLA group can use this key to hold or resume a call.

To configure the Public hold via phone interface

- Press Menu →Features →Function Keys→Line or Line Keys as Function Keys → Line Key1(for example)
- 2. Select the wanted Line or Line Key.
- 3. Press (>) and (<) key to select the Public Hold.
- 4. Press Or Save soft key to save the configuration

To configure public hold via Web Interface

1. Click Function keys \rightarrow Line Key.

2. Select the desired Key and select public hold in the Type.

3.	Click the	SaveSet	button to save the configuration.

Hot Desking

Hot Desking originates from the definition of being the temporary physical occupant of a work station or surface by a particular employee. A primary motivation for Hot Desking is cost reduction. This feature is regularly used in places where all employees are not in the office at the same time, or not in the office for a very long time, which means their personal offices are often vacant, consuming valuable space and resources.

You can use Hot Desking on the IP phone to logout the existing accounts and then log in a new account, which allows many users to share the phone resource in different times. To use this feature, first you need to configure a Hot Desking key in the advance settings. This feature is supported on the version 1.0.3.82 or later

To configure the hot desking via phone interface

- Press Menu → Features → Function Keys → Line or Line Keys as Function Keys → Line Key1(for example)
- 2. Select the wanted Line or Line Key.
- 3. Press > and |< key to select the hot desking.
- 4. Enter the display name in the value field.
- 5. Press Or Save soft key to save the configuration

To configure the hot desking via web interface:

- 1. Click Function keys \rightarrow Line Key.
- 2. Select the desired Key and select hot desking in the Type.
- 3. Enter the number in the value field.
- 4. Select the desired account from the pull-down list of Account field.
- 5. Click the SaveSet button to save the configuration.

To use the Hot desking feature on the user interface:

- 1. Press the Hot desking key when the IP Phone is idle.
- 2. Enter the Extension number and password

	Line Key1	
1.Type:	HotDesking	$\langle \rangle$
2.Label:		
Cancel	Switch	Save

3. Click Save softkey

You can see the account information which has changed.

Note :

This feature is not available on all servers. For more information, contact your system administrator.

ACD

ACD feature is often used in offices for customer service, such as call center. The ACD system handles large volumes of incoming calls from callers who have no need to talk to a specific person but who require assistance from any of the different personnel at the earliest point. The ACD feature on the Htek IP Phone allows the ACD system to distribute calls from large volumes of incoming calls to the registered IP phone users. To use this feature, first you should configure an ACD key in the advance settings.

To configure the ACD via phone interface

- Press Menu →Features →Function Keys→Line or Line Keys as Function Keys → Line Key1(for example)
- 2. Select the wanted Line or Line Key.
- 3. Press > and < key to select the ACD.
- 4. Enter the label in the label field.

- 5. Select the desired account in the Account field.
- 6. Press () or Save soft key to save the configuration

To configure the ACD via web interface:

- 1. Click Function keys \rightarrow Line Key.
- 2. Select the desired Key and select ACD in the Type.
- 3. Enter the label in the label field.
- 4. Select the desired account from the pull-down list of Account field.
- 5. Click the SaveSet button to save the configuration.

Note :

This feature is not available on all servers. For more information, contact your system administrator.

Zero Touch

You can use this key feature to configure auto provision and network parameters quickly. This feature is supported on the version 1.0.3.82 or later

To configure the zero touch via phone interface

- Press Menu → Features → Function Keys → Line or Line Keys as Function Keys → Line Key1(for example)
- 2. Select the wanted Line or Line Key.
- 3. Press > and < key to select the zero touch
- 4. Press or Save soft key to save the configuration

To configure the zero touch via web interface:

- 1. Click Function keys \rightarrow Line Key.
- 2. Select the desired Key and select zero touch in the Type.
- 3. Click the SaveSet button to save the configuration.

To use the zero touch feature on the user interface:

- 1. Press the zero touch key when the IP Phone is idle.
- 2. The IP Phone will enter the WAN Port interface; you can change the WAN Type by pressing the Navigation keys.
- 3. Press the Next softkey to enter Network interface, then you can configure some information.
- 4. Press the Next softkey again, you can configure auto provision information.
- 5. When you finish the setting, you can press the OK to accept the changes.

Note :

This feature is not available on all servers. For more information, contact your system administrator.

Multicast Paging

You can use multicast paging to quickly and easily forward out time sensitive announcements to people within the multicast group. You can configure a multicast paging key or a paging list key on the phone, which allows you to send a Real Time Transport Protocol (RTP) stream to the pre-configured multicast address/addresses without involving SIP signaling. You can configure the phone to receive an RTP stream from pre-configured multicast listening address/addresses without involving SIP signaling. You can specify up to 10 multicast listening addresses.

Sending RTP Stream

To configure a multicast paging key via phone interface

- 1. Press Menu→Feature →line or Line Key→Line Key1 (e.g.)
- 2. Press (>) and (<) or switch key to select the multicast paging in the type field.
- 3. Enter the multicast IP address and port number (e.g., 224.5.6.20:2000) in the Value field.
- 4. The valid multicast IP addresses range from 224.0.0.0 to 239.255.255.255.
- 5. Press or Save soft key to save the configuration

To configure a multicast paging key via web interface

- 1. Function keys->line key :
- 2. Select the desired Key and select multicast paging in the Type.
- 3. Enter the multicast IP address and port number (e.g., 224.5.6.20:2000) in the Value field.

The valid multicast IP addresses range from 224.0.0.0 to 239.255.255.255.

4. Click the SaveSet button to save the configuration.

Sending RTP Stream :

Press the multicast paging key when the phone is idle.

The phone sends RTP to a preconfigured multicast address (IP: Port). Any phone in the local network then listens to the RTP on the preconfigured multicast address (IP:Port). For both sending and receiving of the multicast RTP, there is no SIP signaling involved. The multicast paging key LED illuminates solid green.

Receiving RTP Stream

You can configure the phone to receive a Real Time Transport Protocol (RTP) stream from the pre-configured multicast address/addresses without involving SIP signaling. You can specify up to 10 multicast addresses that the phone listens to on the network.

How the phone handles incoming multicast paging calls depends on Paging Barge and Paging Priority Active parameters configured via web user interface.

Paging Barge

The paging barge parameter defines the priority of the voice call in progress. If the priority of an incoming multicast paging call is lower than that of the active call, it will be ignored

automatically. If Disabled is selected from the pull-down list of Paging Barge, the voice call in progress will take precedence over all incoming multicast paging calls. Valid values in the Paging Barge field:

- 1 to 10: Define the priority of the active call, 1 with the highest priority, 10 with the lowest.
- Disabled: The voice call in progress will take precedence over all incoming paging calls.

Paging Priority Active

The paging priority active parameter decides how the phone handles incoming multicast paging calls when there is already a multicast paging call on the phone. If enabled, the phone will ignore incoming multicast paging calls with lower priorities, otherwise, the phone will answer incoming multicast paging calls automatically and place the previous multicast paging call on hold. If disabled, the phone will automatically ignore all incoming multicast paging calls.

Multicast Codec :

You can only configure the codec by web interface. To configure multicast codec key via web interface

- 1. Click Directory ->Multicast Paging :
- 2. Select the desired codec from the pull-down list of Multicast Codec
- 3. Click the SaveSet button to save the configuration.

To configure multicast listening addresses via web interface:

- 1. Click Directory->Multicast paging.
- 2. Select the desired value from the pull-down list of Paging Barge.
- 3. Select the desired value from the pull-down list of Paging Priority Active.
- 4. Enter the multicast IP address/addresses and port number (e.g., 224.5.6.20:2000) which the phone listens to for incoming RTP multicast in the Listening Address field.
- 5. Enter the label in the Label field.
- 6. Click SaveSet button to save the configuration.

	k				Upgrade logout

Upgrade

To upgrade via HTTP, the "Management"-> "auto provision" -> "Firmware Upgrade"-> "Upgrade Mode" field needs to be set to HTTP, respectively. "Firmware Server Path" needs to be set to a valid URL of a HTTP server, server name can be in either FQDN or IP address format. Here are examples of some valid URL.

- e.g. firmware.mycompany.com:5688/Htek
- e.g. www.mycompany.com:5688/fm/ Htek
- e.g. 218.2.83.110

Instructions for firmware upgrade via HTTP:

(1) End users can choose to download the free HTTP server from http://httpd.apache.org/ or use

Microsoft IIS web server. Then setup HTTP server.

(2) Unzip the firmware file and put all of them under the *root*/fm directory of the HTTP server.

(3) Visiting "HTTP:\\192.168.0.254\fm\fw926.rom on localhost by browser" to verify the HTTP Server. If visiting "HTTP: \\192.168.0.254\fm\fw926.rom on another computer and it not prompted to download fw926.rom file on this computer, please check if the firewall is on or off (Suggest you turn off the firewall).

To configure the server path via web interface:

- 1. Click Management \rightarrow Auto provision:
- 2. Select the upgrade mode in the upgrade mode field

- 3. Enter the Firmware server path and config server path (192.168.0.254 is HTTP server).
- 4. Enter the HTTP server's username and password (optional).
- 5. Click the SaveSet button to save the configuration.
- 6. Restart the UC926, IP Phone will restart and auto-get firmware files from HTTP server.

NOTES:

- Htek recommends end-user use the Htek HTTP server. For large companies, we recommend to maintain their own TFTP/HTTP/FTP/HTTPS server for upgrade and provisioning procedures.
- Once a "Firmware Server Path" is set, user needs to update the settings and restart the IP Phone. If the configured firmware server is found and a new code image is available, the UC926 will attempt to retrieve the new image files by downloading them into the UC926's SDRAM. During this stage, the UC926's LEDs will blink fastly until the checking/downloading process is completed. Upon verification of checksum, the new code image will then be saved into the Flash. If TFTP/HTTP/FTP/HTTPS fails for any reason (e.g. TFTP/HTTP/FTP/HTTPS server is not responding, there are no code image files available for upgrade, or checksum test fails, etc), the UC926 will stop the TFTP/HTTP/FTP/HTTPS process and simply boot using the existing code image in the flash.
- Firmware upgrade may take as long as 3 to 8 minutes over Internet, or just 1 minutes if it is performed on a LAN. It is recommended to conduct firmware upgrade in a controlled LAN environment if possible. For users who do not have a local firmware upgrade server.
- ➤ Htek's latest firmware is available at <u>www.htek.com</u> →Support→Firmware Download.
- > Oversea users are strongly recommended to download the binary files and

upgrade firmware locally in a controlled LAN environment.

To upgrade manually via the Web configuration interface

- 1. Click Management \rightarrow Upgrade
- 2. Click Brower or the blank.
- 3. Select the firmware (fw926.rom) and then click

Troubleshooting

Why is the phone LCD screen blank?

- 1. Ensure your phone is properly plugged into a functional AC outlet.
- 2. Ensure that the phone isn't plugged into a plug controlled by a switch that is off.
- 3. If the phone is plugged into a power strip, try plugging it directly into a wall outlet instead.
- 4. If your phone is powered from PoE, ensure you use a PoE compliant switch or hub, or contact your system administrator for more information.
- 5. Check if the power LED is on to ensure that the phone is powered on.

Why does the phone display "Network Unavailable"?

To resolve:

- Ensure that the Ethernet cable is plugged into the Internet port on the phone and the Ethernet cable is not loose.
- Ensure that the switch or hub in your network is functioning well.
- If the problem still persists, Contact your system administrator for more information.

Why can't I get a dial tone?

To resolve:

- Check for any loose connections and that the phone has been installed properly. For the Installation instructions, refer to the phone installation section.
- Check whether dial tone is present on one of the audio modes.
- Switch between the Handset, Headset (if you have) or Hands-Free Speakerphone to check whether dial tone is present for one of the audio modes.
- If the dial tone exists on another audio mode, connect a different handset or headset to isolate the problem.

Where to set the tone?

You can set the tone on web interface:

- Click Setting→Tones
- Define the dial tone, ringing, busy tone...
- For the tones, you can check with your system administrator.
- For More Click <u>Tone Notes</u>.
